# ≡ CAPABILITY STATEMENT

## Key Differentiators

### Troubled Project?

Projects sometimes require reassessment to stop cost overruns or make a change in direction to meet business objectives.

Our consultants use Six Sigma thinking to determine root cause, realign project focus and recommend the appropriate deliverables to recover a troubled project. We have the expertise to step in and deliver complex IT and Construction projects on-schedule and within budget.

### Security Risk Assessments

Our consultants perform security risk assessments to assist businesses in developing more effective network security strategies to mitigate exposures from operational risks, reputation risks and more.

We help businesses use this assessment to analyze potential key risk exposures, evaluate impacts and develop actionable plans to protect mission-critical computing environments.

### Organizational Change and Business Process Optimization

Our consultants are keenly aware that customers experience your business' value through your processes!

We provide SWOT analysis, strategic planning, process re-engineering, and organizational development services.

## Digital Transformation

Our program management goal is to build relationships between your business and our partners. We leverage our experiences with CLOUD, UCASS, SD-WAN, Information Security, IAAS and IOT service providers to map your organization's digital strategies to your value chain to design and deliver optimal long-term, transformational solutions for your business.

### Testimonials~

*Belinda Clark is exceptional when it comes to producing project deliverables and she manages tasks to completion. Ms. Clark is extremely calm under pressure and her ability to identify gaps quickly, generate a plan and deliver is unprecedented. ~Anita C., State of Georgia Quality Assurance/Change Manager*

*Ms. Clark's management style is extremely accessible and she is a very hands-on leader. She has all the traits you would need in a senior leader, especially as your organization looks to expand into new business territory. Belinda is fearless in her business approach, and her instincts are impeccable...Ms. Clark is one of those rare employees who understands the natural cycle of productivity within an organization." ~Ben L. Graham, Former MARTA AGM/CIO*
